
name: Feature request
about: Suggest an idea for this project
title: "[FEATURE] "
labels: enhancement
assignees: "

Is your feature request related to a problem? Please describe.

A clear and concise description of what the problem is. Ex. I'm always frustrated when [...]

Describe the solution you'd like

A clear and concise description of what you want to happen.

Describe alternatives you've considered

A clear and concise description of any alternative solutions or features you've considered.

Additional context

Add any other context or screenshots about the feature request here.

Implementation details

If you have ideas about how this could be implemented, please share:

- Which components/files would need to be modified
- Any new dependencies that might be needed
- Database schema changes required
- API endpoints that need to be created/modified

Impact assessment

- How many users would benefit from this feature?
- Would this be a breaking change?
- What's the priority level (low, medium, high)?

Checklist

- [] I have searched existing issues to ensure this is not a duplicate
- [] I have provided sufficient detail about the requested feature
- [] I have considered the impact on existing functionality
- [] I have thought about the implementation approach
